

Name _____

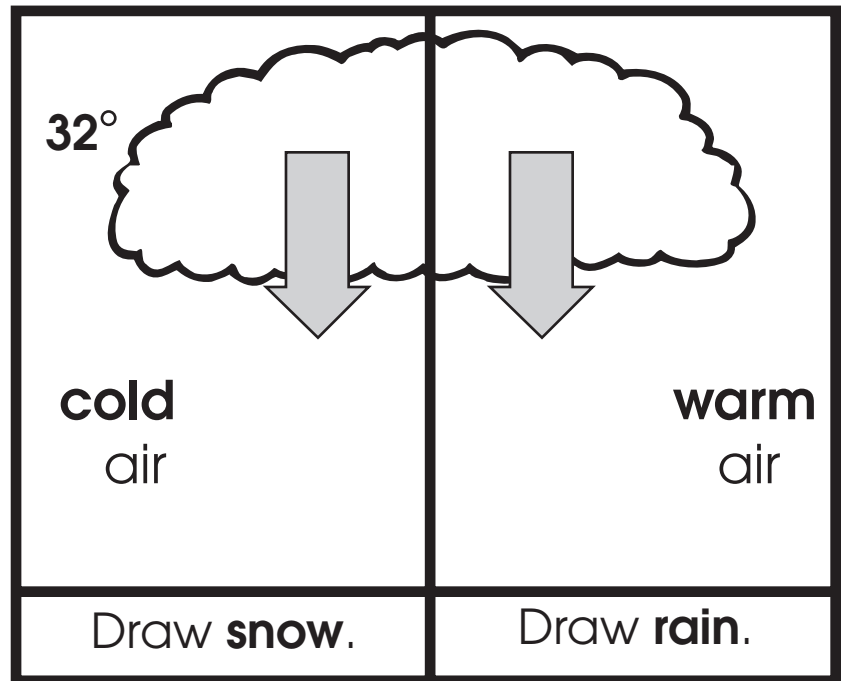

Winter weather
Snow/snowflakes

Snow Show

Water drops are in clouds.

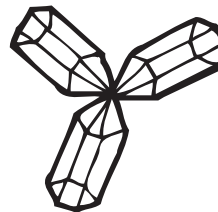

The drops get cool and begin to fall from the clouds.

When the air below the cloud is cold, the drops fall as **snowflakes**.

Snowflakes are made of **crystals**.
The crystals have different **shapes**.

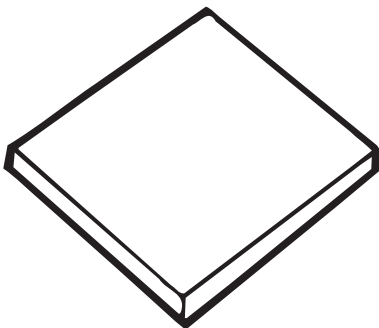

Color your favorite crystal.

Study some snowflakes on a snowy day!

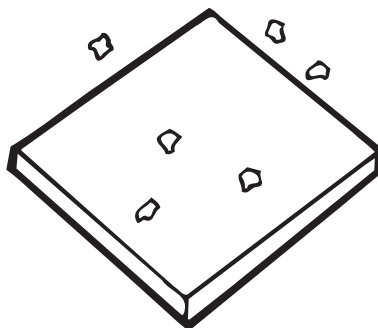

1. Chill

a square of black tagboard.

2. Hold

the square outside until several flakes land on it.

3. Look

at the snowflakes with a magnifying glass.
